

PAST PERFORMANCE DOCUMENT COLLECTIVE INTERNAL FUND

This chart shows the product’s performance as a percentage of loss or gain per year over the past 5 years.

Past performance is not a reliable indicator of future performance. Markets could evolve very differently in the future. It can help you assess how the fund has been managed in the past.

Year of creation of the product : 2023

The product creation year as well as the current year are not a full calendar year, so there is too little data to provide retail investors with useful insights into past performance. It is therefore not included in the diagram above.
