DEDICATED INTERNAL FUND - "SECURE RISK PROFILE"

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor or Sogelife S.A.. The figures do not take into account your personal tax situation, which may also affect how much you get back. The tax legislation of the home Member State of the retail investor may have an impact on the amounts actually paid.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance from a composite of benchmarks representing a "Secure" investment universe over the last 13 years.

The retail investors may lose some or all of the amount invested.

The performance scenarios have been developed in accordance with the requirements of the regulations in force. However, they do not constitute a commitment on the part of the insurer and cannot prejudice the actual performance of the product.

RECOMMENDED HOLDING PERIOD:	8 Years	
EXAMPLE INVESTMENT	€ 10 000

WHAT HAPPENS IF SOGELIFE IS UNABLE TO PAY OUT?

In the Grand Duchy of Luxembourg, there is no guarantee fund/indemnity system. However, there is a mechanism to protect investors who sign an insurance contract with a Luxembourg insurer. This protection system is based on the legal and physical separation between, on the one hand, the regulated assets representing the insurer's commitments to its clients and, on the other hand, the assets which are not regulated, known as "free assets", at the disposal of the insurer. In the event of default by SOGELIFE SA, the Insured may suffer financial losses but are considered to be creditors with a privileged rank. This privilege takes precedence over all others, including the privileges of the State, the Treasury and the employees of the Insurer. If the custodian bank fails, there is a possibility of total loss of cash, but the deposited securities must be recoverable in full.

WHAT ARE THE COST?

COSTS OVER TIME

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- € 10 000 is invested.

	If you exit after 1 Year	If you exit after 8 Years
TOTAL COSTS	€ 173	€ 1 381
ANNUAL COST IMPACT (*)	1.7%	1.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.69% before costs and -0.04% after costs.
